

Kindergarten

Sorting, classifying and matching shells

Painting celery fish scales.

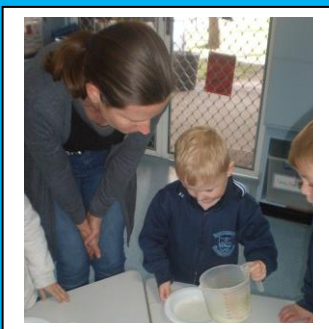

Painting to show prior knowledge and experience.

We completed a unit of work all about the ocean. We developed problem solving, investigation and enquiry skills through hands-on tasks and play.

We made egg submarines. We looked at the properties of different materials and learnt about floating and sinking.

We celebrated Science Day by joining with the Pre-Primary students and completing some amazing experiments. We also had guest speakers and parents to help us engage and learn.

We continue to develop our fine motor skills and extend our literacy and maths knowledge through discussion, exploration and targeted activities.
