

Pre-Primary

Science

In Science we have been learning about changes in the weather. We carried out a survey and discovered that most of the class enjoy cold weather! Because we are clever scientists, we used that data to construct a graph. We have also been investigating how changes in the weather affect our daily lives. We can't wait to make a rain cloud from shaving cream to help us discover more about the water cycle.

Mother's Day Afternoon

On Friday 11th May we invited our lovely mothers to an afternoon of pampering. The students make necklaces and bookmarks for their Mum. They were treated to a hand and neck massage and had their hair styled with pretty coloured ribbons.

Dino World Incursion

On Friday 18th May we participated in an incursion all about dinosaurs. We met a large dinosaur named James and looked at different dinosaur fossils. We thoroughly enjoyed this incursion.

Health

In Health, we have been discussing our feelings and being aware of the feelings of others.

Literacy

In Literacy, we have been practising blending and segmenting consonant-vowel-consonant words and using them in writing activities. We have been using story maps to guide our writing. We have been playing language games to build confidence in speaking and listening to others.

Maths

We are learning all about polygons, 2D and 3D shapes. We are even learning some of the names in Italian! We are learning to subitise small collections of objects.

Digital Technologies

In Digital Technologies, we have been using the Osmo kits to play number and language games. We have enjoyed using the drawing app to us in drawing objects. We continue to use the coding apps on the I pads and Bee-Bot robots.

Religion

As part of our MJR program we have introduced 'Dob-in Day Friday'. Students have an opportunity to report back on any 'Spirit of Jesus' moments to the class.
