

# Pre-Primary - Term 3

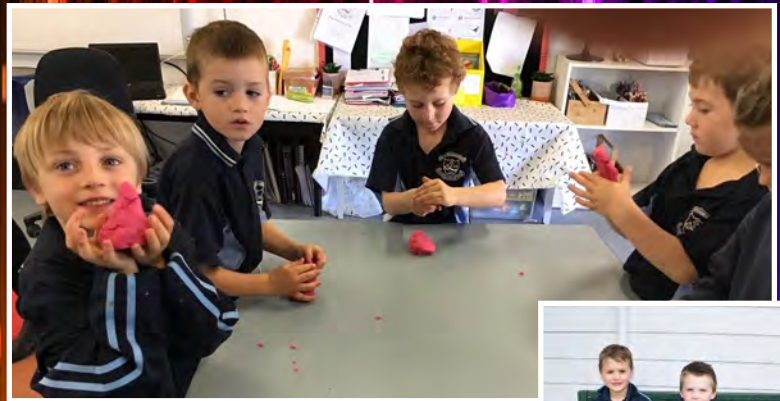

## Science

In Science, we have been learning about push and pull forces. We spent some time on the playground equipment and identified whether a push or pull forces was required to use the equipment. We have just finished designing our Roly Poly toys.

## Literacy

In Literacy, we continue to practise blending and segmenting consonant-vowel-consonant words and using them in writing activities. We have been using story maps and sequencing activities to recall the story.

We have had a STEM challenge for each nursery rhyme. We had to design a log using paper to hold 5 little speckled frogs. Catapult an animal over a moon (chair) and make dioramas of habitats for animals.

In our Inquiry time, we have been travelling around the world. We travelled to Paris and learnt about the Eiffel Tower. We learnt about big buildings and the busy city of New York.

## Digital Technologies

In Digital Technologies, students have been learning how to give commands and make simple algorithms in mapping activities.

## Maths

We are learning about skip counting by 2's and looking at number lines. We have also been discussing the attributes of 2D and 3D shapes.
