

Pre-primary Term 3

Book Week

We have amazed our teachers with our progress from the beginning of the year. Every morning we jump out our sounds before entering the classroom. We know all of our sounds and most of the letter names. This term we are learning digraphs and applying this knowledge to write decodable sentences.

Dictation

We have begun to solve simple addition and subtraction problems. We have used concrete materials to help our thinking. We are investigating the different ways we can solve problems and focusing on our counting skills.

Letters and Sounds

Maths

Last term, we did our assembly item and loved sharing with our families what we had learnt about farms. This term, we have had a fortnightly focus on the books shortlisted for the Book Week Awards. We loved dressing up for Book Week and sharing the book our character featured in with our classmates.

Our Assembly

Ball Skills

In our PMP sessions this term we have been focusing on our throwing and catching skills. We are also playing games in preparation for Term 4's sports carnival.

This term, we have also been looking at the weather and have been collecting information on the temperature and rainfall and sending in the information to GWN's Weather Watch program.

Construction

We love building and creating projects. After reading *The Three Billy Goats Gruff*, we created three billy goats and a bridge to support them. Then we used the goats as puppets to retell the story and send to our families via Seesaw. We have also completed some amazing artwork using different materials.

STEM

In Religious Education, we enjoy hearing stories about Jesus and how he loves us. We try to demonstrate the spirit of Jesus. We are learning about prayer and how we can talk to God. We visited Father Wayne and he showed us the different parts of the church and the significance of why he wears different colours throughout the year.
