

# Year 2

Year 2's have started the year with lots of new learning experiences.

In maths we have been learning about metres and centimetres as well as 2D and 3D shapes. With all this knowledge we had to design and create a Marble Ramp.

In Health we have been learning about Sun Safety and protecting our skin. We used sausages to represent our skin, by putting one sausage in the sun without sun protection and one with sunscreen and shade. This was great fun as well as learning how important it is to wear sunscreen.
