# Year 3

Year 3 is the place to be with all our fun filled learning!

We have been exploring number- from place value, to mental addition strategies, to written addition strategies.

Together we created our class purpose. We discussed why we come to school and what it means to be in our class.

We come to school to be amazing, be kind, learn and improve, be with our friends and laugh.

We have been looking at perspective and depth in art and created these landscapes.

As we continue to explore a variety of learning platforms, Digital Technologies is an exciting and engaging way to create and learn. We have been discovering our responsibilities and rights as members of the digital world, as well as embracing our creative side with learning how to take creative photos and enhance presentations.
