

Year 3

We have been working really hard on the new Accelerated Reader program. Goals were set and year 3's were off to reach their targets! It is so wonderful to see year 3's enjoying reading.

In Digital Technologies this term we have been learning about algorithms. First we programmed people "robots" to follow a code, before we moved onto Coding using Scratch Jr.

Passion Projects have been on the agenda this term! So many creative ways to present information as well as some amazing burning questions to answer. Some people made board games, some made a podcast!
