

Year 5 Term One

Term One started without our traditional desks. We are using some older tables and storing our books and stationery in book boxes instead. We have been investigating how flexible learning spaces can help us in our day. We have learnt about spaces called Campfires, Watering Holes, Caves and Life (based on work by Thornburg and Hewes). This has meant a change to how we work throughout the day, and we have enjoyed the ability to move around the classroom during the day.

One of our latest activities was to make full size cut outs of the furniture (tables mainly) we think would work best for our classroom, then we took out all our old furniture from our room and presented our plan to Mrs Hegney.

We are now waiting anxiously for our new flexible learning spaces furniture.

In the meantime, it has been a very busy term and we have completed lots of Maths, English, Religion, Science and HASS activities. We have learnt about Warm and Cool colours and how famous artists used this in their work. We have completed Hockey and Cricket clinics, and, most importantly, we have also adapted to wearing masks in the classroom.
