

# Year 5

Our Assembly at the beginning of Term Three was based on our knowledge of the Eureka Stockade. We used our knowledge of the topic to help write our own assembly.

Term Two was very exciting as our new class furniture finally arrived. We have had fun moving our classroom around and trying to find the best configuration of desks for all our subjects.

We have also been improving our basic number facts by playing various card and dice games which is a fun way to learn Mathematics.

The Science day STEM challenge was great fun as was the 3D model making session in Mathematics and the try outs for the Creative Edge Teams.
